ABOUT OUR CREATORS

BOT LOGIC LABS

BOT LOGIC LABS:

Bot Logic Labs offers a multitude of services including web, app, DApp and multi-facet database design. When paired with our Direct-to-Consumer algorithm, and combined with our proprietary digital network access (DNA), our clients realize a much higher success rate through our cutting edge targeted marketing.

Bot Logic Labs has established a reputation for building disruption within the industries we've identified as emerging opportunities. This disruption opens up new revenue streams for projects that have limited budgets or have been forced to bootstrap initial operations. Since bootstrapping operating costs oftentimes leads to project failure, we have designed our internal modeling to identify these opportunities before they fail. Provided the project meets with our proprietary criteria, we will provide the project

funding, technology development, and product marketing to achieve the project's success.
